	719	170 Hobson Ave

### Environmental Review Comments

These facilities all previously had tanks associated with them. The tanks have been removed by the Navy. This project calls for the installation of replacement tanks at each location.

None of the sites were noted to have any AOC's (areas of concern), or SWMU's (solid waste management units) associated with them.

No soil shall leave the site without permission. Any soil excavated during this project should be stored on site and returned to the excavation after the work is done. Sidewalk and pavement debris can be disposed of as construction waste.

If excess soil is not able to be reused and needs to be disposed, please contact our office. Note that no soil can leave the base without environmental testing. Point of contact is Billy Drawdy, CSO Environmental, at (843) 743-9985, extension 29.

**MESSAGE:**

Sean,

We are going to proceed with the expeditious installation of above ground fuel tanks for the following houses:

Quarters Y & Z	1510/1516 Hobson Ave.
Quarters 706	315 Navy Way
Quarters 717	190 Hobson Ave.
Quarters 719	170 Hobson Ave.

This is being driven by the need to activate these units in support of vacating the Panama Houses for asbestos/lead paint removal efforts. We will use the same installation procedures and the same type tank as was used on the other houses. The installations for Quarters 706, 717, & 719 will be eventually be permanent. The installations for Quarters Y & Z will be temporary, pending completion of asbestos and lead paint removal in the Panamas. If you have any questions, please call.

Thanks.

Rick Brown

SHIPTECH AMERICA LLC

NORTH CHARLESTON SC 29405

TO: RICK BROWN  
DATE: 23 NOVEMBER 98  
FROM: DAN KAUTZMAN  
SUBJECT: ABOVE GROUND TANKS AT THE HOUSING AND SPORTS BAR

240 GALLON TANK

Proposed above ground 240 gallon tanks to be placed at designated housing will be installed on the ground  
Setting on attached stands. All fillers and vents will be of an approved style. All fuel connections will be  
Run underground with compression type fittings where needed. And all fuel lines will be copper. Tanks  
Will also be monitored and logged on a weekly basis.

Tank information is as follows:

MANUFACTURER

Atlantic Fabri Tech, Mcgakeysville, VA.  
U/L approved secondary containment  
Above ground tank for flammable liquids on supports

TESTING

U/L Standard 142 and meets NFPA 30 and 30H codes and BOCA codes.

CSO Log Number = 142

Request Date = 21 January, 1999

Comments Date = 21 January, 1999

Location = Along Fourth Street, from Air Park Road to Building 2536,  
Naval Station Annex, Remount Road

### Environmental Review Comments

Project proposes to run a 2" gas line along Fourth Street, from an existing line on Air Park Road to Bldg 2536.

No soil shall leave the site without permission. Any soil excavated during this project should be stored on site and returned to the excavation after the work is done. Sidewalk and pavement debris can be disposed of as construction waste.

If excess soil is not able to be reused and needs to be disposed, please contact our office. Note that no soil can leave the base without environmental testing. Point of contact is Billy Drawdy, CSO Environmental, at (843) 743-9985 ext 29.

OFFICE OF THE MAYOR

R. KEITH SUMMEY  
MAYOR*City of*  
*North Charleston*  
SOUTH CAROLINA

January 20, 1999

Shawn McDonald  
RDA  
1690 Turnbull Avenue, Suite NH-47  
Charleston, S. C. 29405

Dear Shawn:

The City of North Charleston would like to request that it be allowed to authorize S. C. E. & G to run a new 2" gas line to Building 2536 located on Fourth Street at the Naval Annex property. The City currently leases this building from the RDA.

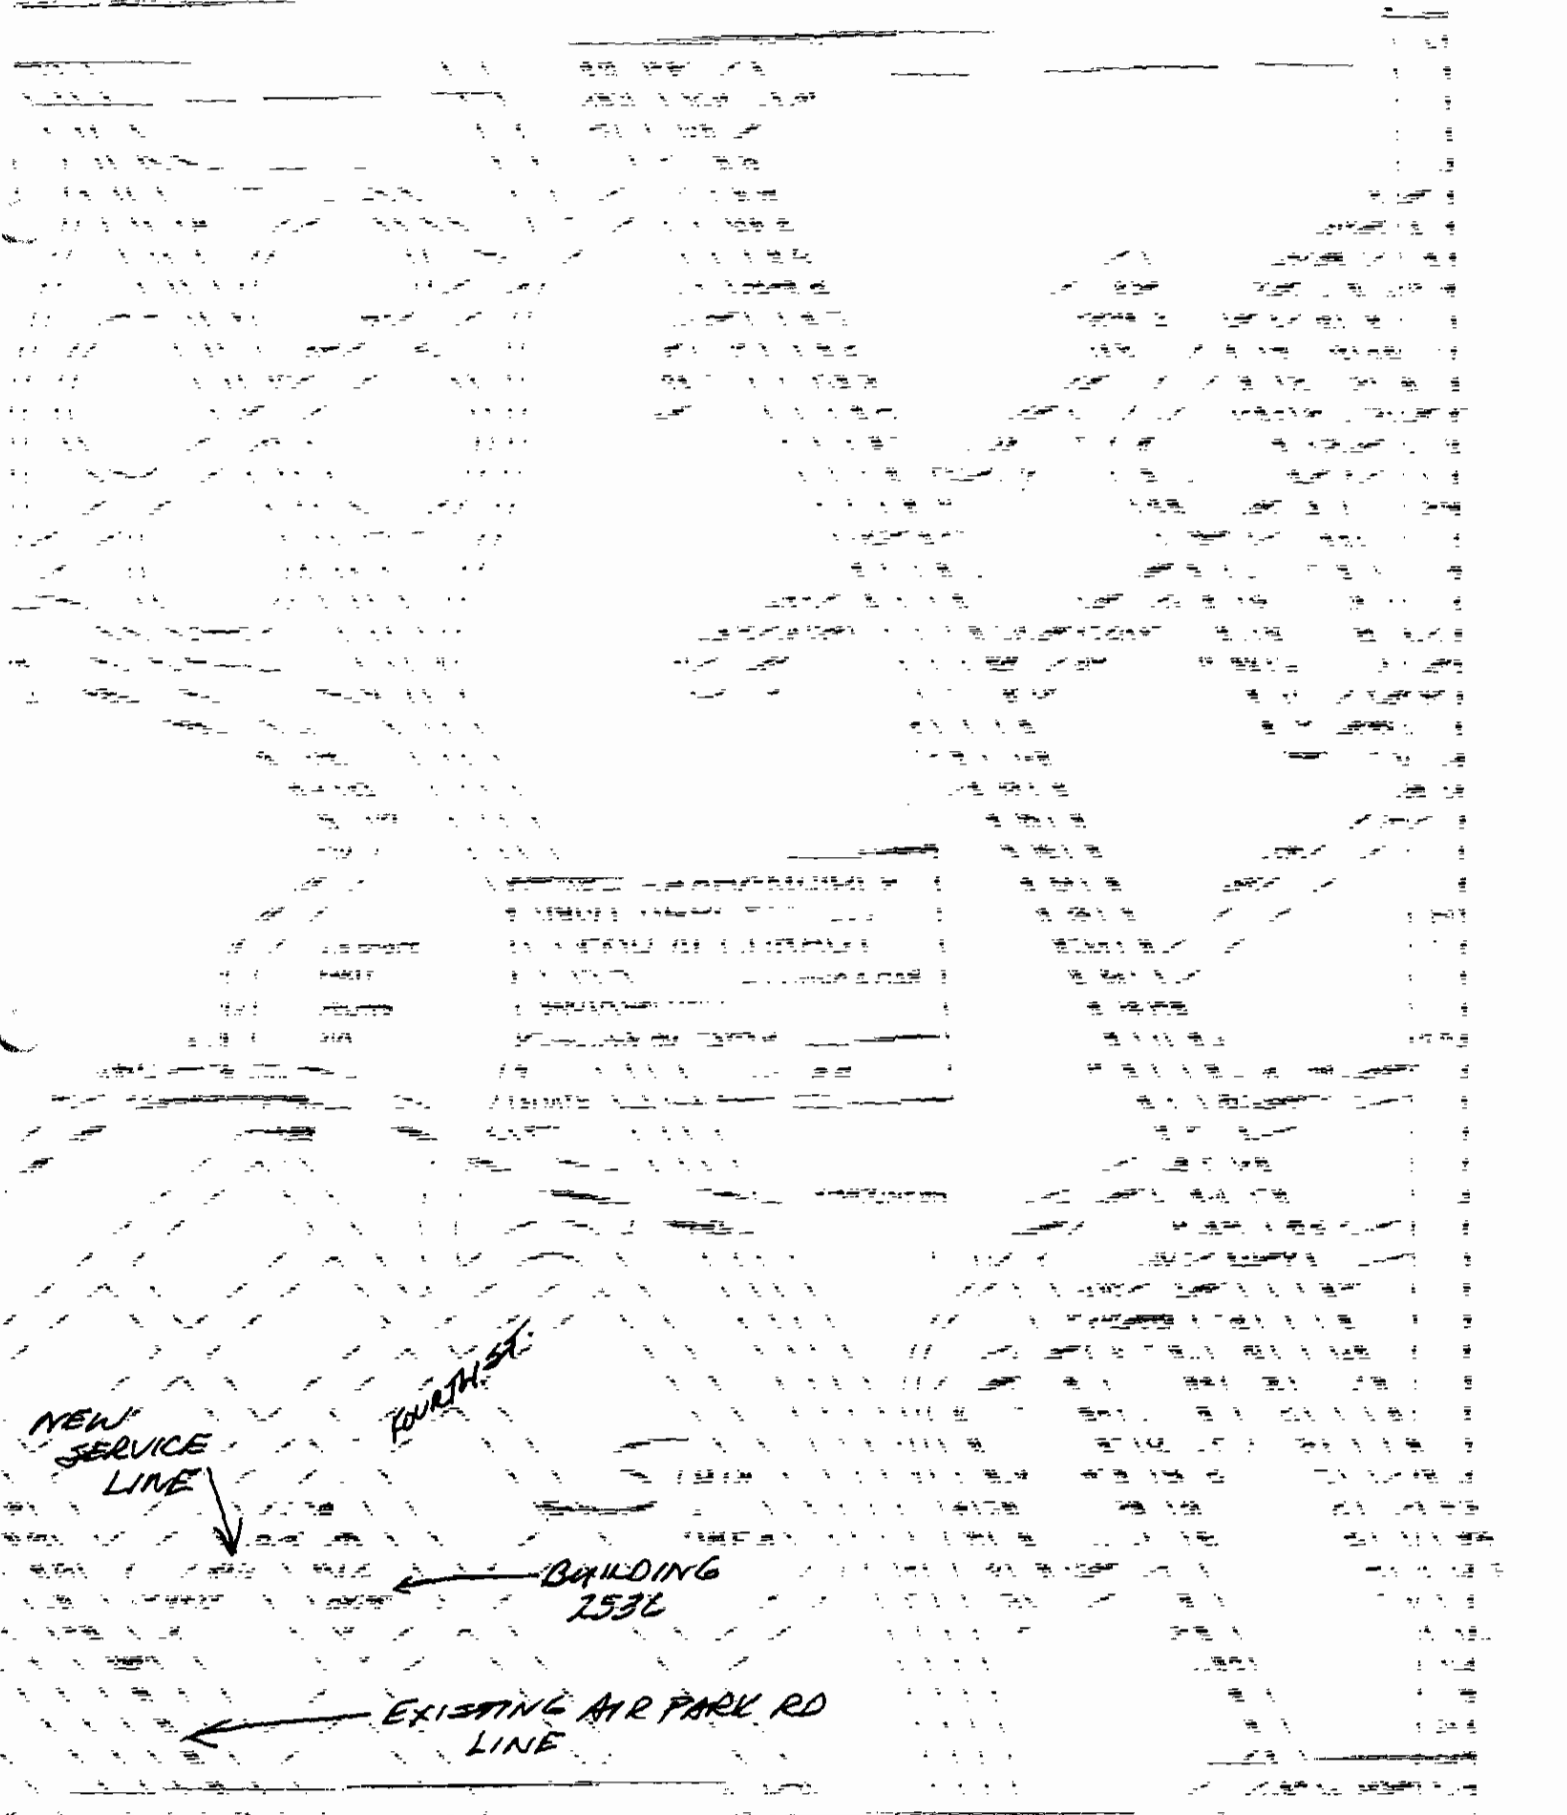

Attached, please find the proposal from S. C. E. & G. for the new 2" gas main from Air Park Road to Building 2536.

The City would incur the cost to have the new gas line run with the understanding that S. C. E. & G. would secure the necessary digging permits to install the new line.

If you have any questions, please call me at 740-2614.

Sincerely,

  
Mike Hawkins, Director  
Building Operations

### Environmental Review Comments

Based on conversations with Mr. Eddie Richardson by members of our staff, the project calls for an excavation 12 ft x 10 ft x 4 ft deep to be made. An anchor will be placed in this hole and then covered over.

It is required that the anchor be removed after this project is completed and the site restored. If any unusual soil conditions are noted, contact our office immediately.

No soil shall leave the site without permission. Any soil excavated during this project should be stored on site and returned to the excavation after the work is done. Sidewalk and pavement debris can be disposed of as construction waste.

If excess soil is not able to be reused and needs to be disposed, please contact our office. Note that no soil can leave the base without environmental testing. Point of contact is Billy Drawdy, CSO Environmental, at (843) 743-9985 ext 29.

### Environmental Review Comments

These facilities previously had tanks associated with them. The tanks have been removed by the Navy. This project calls for the installation of replacement tanks at each location.

Approval for Quarters R was previously given in dig permit 134.

No soil shall leave the site without permission. Any soil excavated during this project should be stored on site and returned to the excavation after the work is done. Sidewalk and pavement debris can be disposed of as construction waste.

If excess soil is not able to be reused and needs to be disposed, please contact our office. Note that no soil can leave the base without environmental testing. Point of contact is Billy Drawdy, CSO Environmental, at (843) 743-9985 ext 29.

MESSAGE:

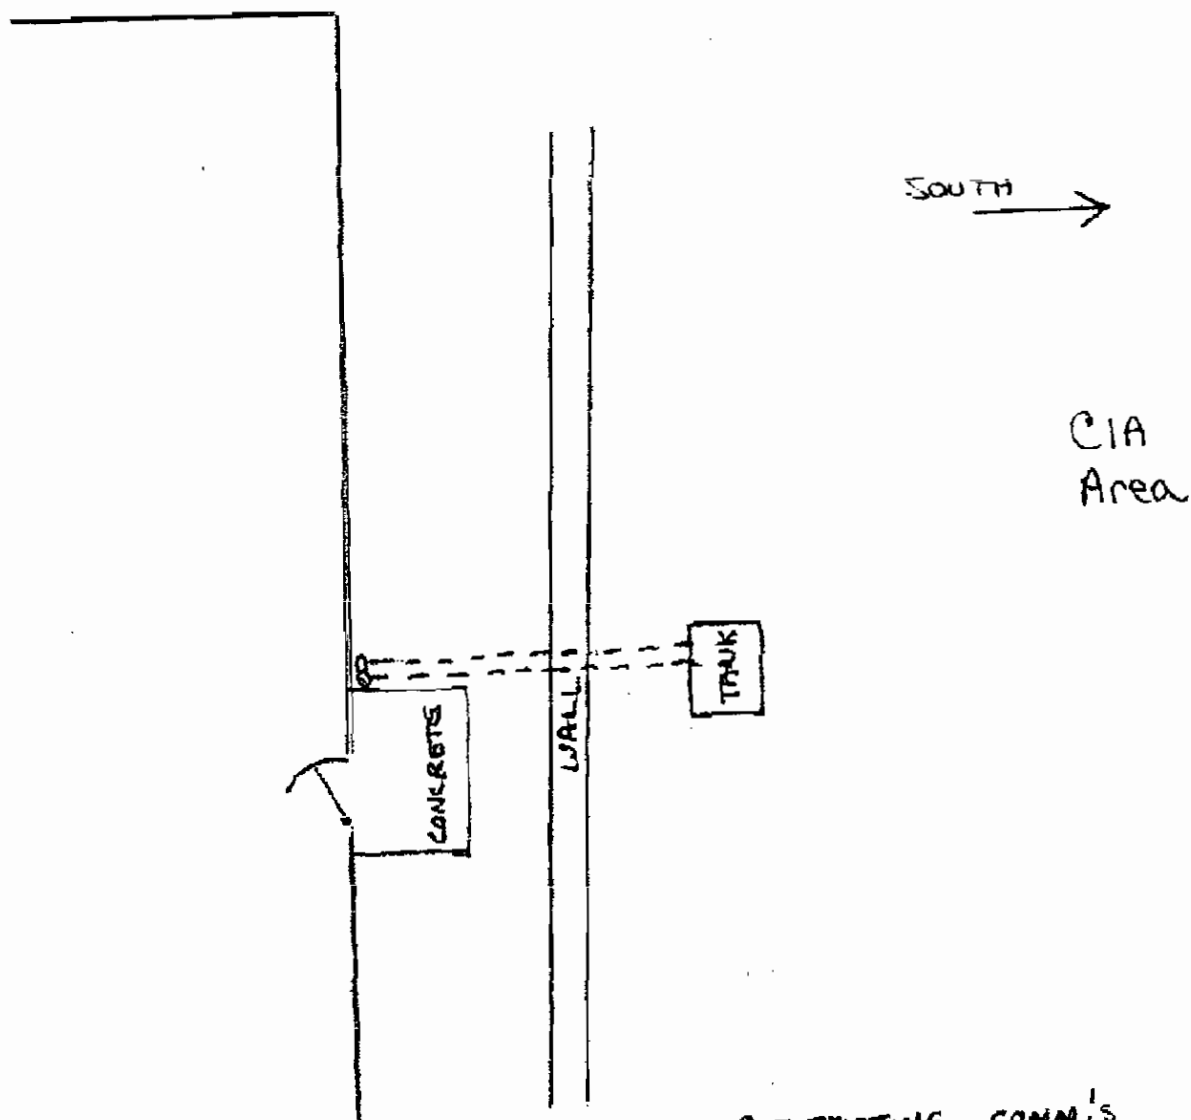

Sean,

Here are two additional drawings showing the location of above ground fuel tanks for Quarters N (160 Everglades) and Quarters R (1485 Hobson). The tanks will be installed in accordance with our previous letter, i.e., copper lines run underground to existing fuel line connections, with the tank sitting on its own support on the ground. We will proceed with the installation unless otherwise directed. Thanks.

## Charleston Caretaker Site Office Excavation Permit

CSO Log Number = 136

Request Date = 31 December 1998

Comments Date = 07 January 1999

Location = Various Locations....

Starting on Hobson Ave at Bldg 20. Moving along Hobson Ave to Pirate Street. Moving along Pirate Street to Thompson Ave. Moving along quay wall to Bldg 681. Moving along Osprey to Hobson. Ending at Hobson Ave.

### Environmental Review Comments

This project proposes to install a variety of conduits underground and encased in concrete for electrical cables. For the purposes of this digging permit, this project consists of two areas of work. The first is the trenching along Hobson Ave, Pirate Ave, and Osprey Street. (Site One) The second is the trenching along Thompson Ave, by the quaywall, behind NS 1 and the old SIMA compound. (Site Two) No environmental problems are noted with Site One. Site Two needs more comment.

With Site Two, the Navy has identified environmental concerns with the soil along Thompson Ave (the quaywall). Digging in this area is not prohibited but caution should be exercised. The primary contaminants are expected to be petroleum based products. Any excess soil excavated in this area must be stored on site, in a paved area and tested before disposal. The paved area behind NS1 should be available for this project.

Based on the knowledge of a previous line rupture in this area, it is possible that some soil may be found that is soaked with product. If this is encountered, STOP work immediately and contact our office at the numbers below.

For Site One, all soil excavated during this project should be stored on site and returned, to the maximum extent possible, to the excavation after the work is done. Sidewalk and pavement debris can be disposed of as construction waste.

If excess soil is not able to be reused and needs to be disposed, please contact our office for disposal instructions. Note that no soil can leave the base without environmental testing. Point of contact is Billy Drawdy, CSO Environmental, at (843) 743-9985 ext 29.

### Environmental Review Comments

These facilities all previously had tanks associated with them. The tanks have been removed by the Navy. This project calls for the installation of replacement tanks at each location.

None of the sites were noted to have any AOC's (areas of concern). One facility is noted to have a SWMU (solid waste management unit) associated with it. This is the former Sports Bar, facility 657. Caution is advised in this area.

No soil shall leave the site without permission. Any soil excavated during this project should be stored on site and returned to the excavation after the work is done. Sidewalk and pavement debris can be disposed of as construction waste.

If excess soil is not able to be reused and needs to be disposed, please contact our office. Note that no soil can leave the base without environmental testing. Point of contact is Billy Drawdy, CSO Environmental, at (843) 743-9985 ext 29.

Charleston, SC 29405

RE: Installation of Above Ground Fuel Tanks

Encl: Drawings & Specifications for Fuel Tanks (7 pages)

Dear Sean:

This letter is a request for permission to install above ground fuel storage tanks to replace the underground fuel storage tanks removed by the Navy. The new above ground fuel storage tanks are of double walled construction, and meet current environmental requirements. It is intended to set the tanks in place on the ground without concrete pads, using the tanks own support. The fuel lines will be copper and run underground to the existing fuel connections at the various facilities. Drawings for the various facilities are included here, along with the specifications of the fuel tanks. The fuel tanks are available for inspection at any time.

The facilities that we would like to install the fuel tanks for initially are:

Officer's Quarters "R" - 1485 Hobson Avenue  
Officer's Quarters "T" - 1531 Hobson Avenue  
Officer's Quarters "S" - 1545 Hobson Avenue  
Officer's Quarters "701" - 399 Turnbull Avenue  
Sports Bar "Bldg 657" - 2177 Bordelon Avenue

Other facilities will be addressed in the near future.

**BUILDING A FUTURE TOGETHER**

Letter regarding fuel tanks

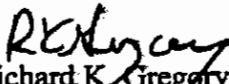

November 24, 1998

Page 2

All fuel tanks are identical, but the placement of the tanks at the various facilities is dictated by the existing location of the fuel lines. The fuel tanks will be inspected a minimum of weekly, and will be filled by fuel truck as one would fill an automobile gas tank. A dipstick system will be used to determine quantity of fuel in the tank.

If you have any comments or questions, please feel free to contact Rick Brown at 991-8674 (cellular) or 554-5009 (office).

Very truly yours,

  
Richard K. Gregory  
President

## Charleston Caretaker Site Office Excavation Permit

CSO Log Number = 132

Request Date = 18 November 1998

Comments Date = 03 December 1998

Location = Various – along Dyess Ave, behind bldg FBM-61

### Environmental Review Comments

In terms of this environmental review, this project consists of two areas of work. The first is a series of power poles to be erected along Dyess avenue. The second is two sets of underground conduit to be installed behind building FBM 61. No problems are noted with the power poles, except for the general restrictions noted in the last two paragraphs. The underground conduit needs more comment.

The Navy has identified an area behind FBM 61 as SWMU 17 (Solid Waste Management Unit 17). The SWMU was established because there was a fuel oil spill in this area back in 1987. An underground pipeline ruptured. Current soil samples in the area have shown the presence of PCB's. Digging in this area is not prohibited, but caution should be exercised. SCE&G is recommended to take any precautions they feel necessary, but at a minimum, efforts should be made to avoid dermal exposure for any workers who may come in contact with the soil.

The installation of the underground conduit at the area behind FBM 61 will require the removal of some asphalt and/or concrete. This area must be returned to its original condition following completion of work.

No soil shall leave the site the site without permission. Any soil excavated during this project should be stored on site and returned to the excavation after the work is done. Sidewalk and pavement debris can be disposed of as construction waste.

If excess soil is not able to be reused and needs to be disposed, please contact our office. Note that no soil can leave the base without environmental testing. Point of contact is Billy Drawdy, CSO Environmental, at (843) 743-9985 ext 29.

### Environmental Review Comments

A review of the environmental literature available on this site showed that there are AOC's (Areas of Concern) associated with the site of this proposed excavation. These AOC's are not expected to impact this excavation. However, if any suspicious soil conditions are noted during this excavation, we request you stop work and contact our office immediately.

No soil shall leave the site the site without permission. Any soil excavated during this project should be stored on site and returned to the excavation after the work is done. Sidewalk and pavement debris can be disposed of as construction waste.

If excess soil is not able to be reused and needs to be disposed, please contact our office. Note that no soil can leave the base without environmental testing. Point of contact is Billy Drawdy, CSO Environmental, at (843) 743-9985 ext 29.

## MEMORANDUM

To: Henry Shepard, Navy Caretaker Site Officer

From: Sean P. McDonell, Facilities Manager

Date: September 10, 1998

Subject: **BELLSOUTH CONDUIT, CABLE AND CROSSBOX INSTALLATION  
REQUEST**

---

BellSouth has requested to place a crossbox, conduit and cable in the locations indicated on the attached drawings. We have also submitted a digging permit request to support this request. The Navy has previously approved an easement for the crossbox at the corner of Turnbull and Hobson Avenues.

Please forward your comments upon completion of your review. Thanks for your assistance.

Mr. Sean McDonnell  
1690 Turnbull Avenue  
Suite NH 47  
Charleston, SC 29405-1955

Dear Mr. McDonnell,

BellSouth Telecommunications requests permission to place conduit, cable and a crossbox beginning at Avenue D along the north side of Turnbull Avenue under the railroad tracks and up Turnbull Avenue to Everglades Avenue. Please return attached form with appropriate signatures.  
See the attached drawings for details.

If you have any questions, please contact Anne Dollason at 722-5168.

Yours truly,

## Charleston Caretaker Site Office Excavation Permit

CSO Log Number = 124

Request Date = 26 August 1998

Comments Date = 28 August 1998

Location = 2055 Thompson Avenue, Building NS26

### Environmental Review Comments

A review of environmental literature available on this site showed that there are AOC's (Areas of Concern) associated with the site of this proposed excavation. AOC 679 was designated for a wash rack at building NS 1. AOC 680 was designated for an area at the north east corner of building NS 26. Neither of these AOC's are expected to impact this excavation.

No soil shall leave the site the site without permission. Any soil excavated during this project should be stored on site and returned to the excavation after the work is done.

If excess soil is not able to be reused and needs to be disposed, please contact our office. Note that no soil can leave the base without environmental testing. If any suspicious soils are encountered during this excavation, contact our office immediately. Point of contact is Billy Drawdy, CSO Environmental, at (843) 743-9985 ext 29.

**Scope of Work** (Depth, width, length, location & sketch as applicable, road closure, interruption of services, etc.)

To trench a 24" min. depth trench from the existing pad-mounted transformer to the exterior wall of Bldg. 65's mechanical room. This trench will involve cutting and patching a small section of the existing walkway to the building. The purpose of the trench is to provide an underground route for the new HVAC equipment. No outages are required to perform the trenching.

NOTE No soil shall be removed from the site without permission. Excavated soil should be placed back in the excavation. To excess material remain, contact Bill Daudy, 803 743 9985 for disposition.

Excavator(s) must establish locations and depths of utilities in work area prior to digging. Locations of utilities, as shown on drawing(s), are approximate and must be field verified by hand locating, resistance locators or other approved methods.

1 ' AWAY FROM

Mr. David Netti,

As we discussed, I want to look at the site at the Navy Base in North Charleston. As far as I can see, I believe you will need 2-280 angled tanks one for each house. This should accommodate these houses efficiently with our keep full program. There should not be any problems with running out of fuel for winter needs.

Below are prices for 2-280 angled tanks. Prices will include delivery and tank set. Our company cannot do the installation you will need a service repair company.

General Manager

## 2- Above Ground 280 Angled Tanks Delivery and Tank Set

Note: We will need a two week notice  
If you decide to purchase.

Cost- 292.50 ea	\$585.00
SC Tax	\$35.10
Total	\$620.10

- 071098 / ~1030 CT Darryl Fenebnot
- Bldg 761 = 743-2062 No answer
- 
- Southdiv = 820-5607
- asked Darryl about this area - Why yellow?
- Asbestos / Lead Based Paint in the buildings themselves -
- Nothing in the soil around the site -
- OK for phone company as long as soil goes back in the hole
- ~> ~~yellow~~ there is remediation either planned or
- underway for these facilities - that is why they are yellow
-

ITEM: ☒ PHONECALL ☐ MEETING ☐ MEMORANDUM ☐ OTHER

DAY/ TIME: 061798/Am

FROM/ SITE: BL

TO/ ATTEND: RW Smith 745-6381

- I called to talk with him about digging permit #114
- dated 15 Jun 98 -

- Q? = how deep will they be going?
- is it direct burial of the cable?
- will it be a big excavation for a duct bank?
- what about trees and road crossings?
- what about other utilities in the area -
- ~~storm~~ ie. storm sewer, sanitary sewer?

⇒ conversation moved into some areas of new work, beyond this digging permit - that RW wanted to talk about -

⇒ For this job however -

- RWS says he has high hopes of reusing the existing conduit. It will be replaced in a few spots.
- The manholes will be dug up and removed.
- They are about 4'x4'x5' deep -
- concrete to be broken up and removed.

DAY/ TIME:

061798 / page 2

FROM/ SITE:

TO/ ATTEND:

- conduit will be direct burial -
- not the cable but a conduit will be buried
- using a trench -
- • also part of this job is to replace the bases
- remove concrete -
- replace w/ plastic covered styrofoam
- again. what to do with the concrete?

- Job was scheduled to start 6/17/98
- RWS says now it will start Mon or Tuesday
- of next week 6/23 or 24

### New projects

- \* installing a concrete duct back down Ave D
- will have Asphalt debris
- \* remove duct barks crossing Hobson & Urduect.
- will have concrete debris ~ 3'x3'x75'

- (DL) Told RWS that I will talk to Billy Droudy about this
- new issues and call him back.

## Charleston Caretaker Site Office Excavation Permit

CSO Log Number = 104 (revised)  
Original Request Date = 24 February 1998  
Revised Request Date = 5 August 1998  
Comments Date = 31 August 1998  
Location = NOAA, 2234 Hobson Avenue

### Environmental Review Comments

First, we want to note that ownership of the area highlighted on this excavation permit has transferred to NOAA. The Navy, however, retains a responsibility for any environmental problems that were present on site prior to transfer of ownership. We welcome the chance to review this revised excavation permit.

It is noted that this excavation permit is being re-submitted due to an increase in the proposed area of excavation.

A search of the environmental data available on this site shows that this general area, bounded by buildings RTC-1 and 200, has both an Area of Concern (AOC) and a Solid Waste Management Unit (SWMU). These are proposed for further investigation by the Navy.

No environmental restrictions exist, however, that would prohibit the proposed excavation. However, the Navy wishes to make the following two comments.

One, a review of the sketch attached to the excavation permit noted two monitoring wells in the general area marked "pavement to be demolished/ replaced". A field check confirmed the existence of these wells. All care must be taken to preserve these monitoring wells. Any damage to the operability of these wells could bring the Navy under violation with SC DHEC.

Two, no soil shall leave the site the site without permission. Any soil excavated during this project should be stored on site and returned to the excavation after the work is done.

If excess soil is not able to be reused and needs to be disposed, please contact our office. Note that no soil can leave the base without environmental testing. If any suspicious soils are encountered during this excavation, contact our office immediately. Point of contact is Billy Drawdy, CSO Environmental, at (843) 743-9985 ext 29.

Environmental Review Comments

First, we want to note that the area highlighted on this excavation permit was transferred to the ownership of NOAA. The Navy, however, retains a responsibility for any environmental problems that were present on site prior to transfer of ownership and welcomes the chance to review this digging permit.

A search of the environmental data available on this site shows that this general area, bounded by buildings RTC-1 and 200, has both an Area of Concern (AOC) and a Solid Waste Management Unit (SWMU). These are proposed for further investigation by the Navy.

No environmental restrictions exist, however, that would prohibit the proposed excavation. Our recommendation for a preferred course of action is that no soil leave the site. All soil goes back in the hole, so to speak. That is, any soil excavated during this project be stored on site and returned to the excavation after the work is done.

If excess soil is not able to be reused and needs to be disposed, please contact our office. Note that no soil can leave the base without environmental testing. If any suspicious soils are encountered during this excavation, contact our office immediately. Point of contact is Billy Drawdy at (803) 743-9985 ext 29.

Billy -

What do you think about this?

I have it on my computer and can make changes

Bill

Bill

- Just add something to the effect that we will only take care of our old problems, not any new ones that they could have caused. Just a CPA clause I know of no problems

Charleston Caretaker Site Office Excavation Permit  
CSO Log Number 104, 24 Feb 1998  
Environmental Review Comments

First, we want to note that the area highlighted on this excavation permit was transferred to the ownership of NOAA. The Navy, however, retains a responsibility for any environmental problems that were present on site prior to transfer of ownership and welcomes the chance to review this digging permit.

A search of the environmental data available on this site shows that this general area, bounded by buildings RTC-1 and 200, has both an Area of Concern (AOC) and a Solid Waste Management Unit (SWMU). These are proposed for further investigation by the Navy.

No environmental restrictions exist, however, that would prohibit the proposed excavation. Our recommendation for a preferred course of action is that no soil leave the site. All soil goes back in the hole, so to speak. That is, any soil excavated during this project be stored on site and returned to the excavation after the work is done.

If excess soil is not able to be reused and needs to be disposed, please contact our office. Note that no soil can leave the base without environmental testing. If any suspicious soils are encountered during this excavation, contact our office immediately. Point of contact is Billy Drawdy at (803) 743-9985 ext 29.

# Charles J. Caretaker Site Office Excavation Permit

Requester: Fill Out Upper Half, Date & Sign

Clearance is requested to proceed with work as follows:

Location: NOAA - Coastal Services Center Contract No:

2234 S. Hobson Ave.

Date:

2-25-98

Has work been staked out? Yes ☐ No ☒

## Facility/Work Involved

Excavation

Pavements

Drainage Ditches

Railroad Tracks

Scope of Work (Depth, width, length, location & sketch as applicable, road closure, interruption of services, etc.)

Excavation of truck pit on west side of building and for new sewer piping on north side of building. Expected maximum depth of excavation is 4'-0". See sketches attached. No road closure or interruption of services is anticipated.

Note:

Excavated soil shall not be removed from the Naval Base without environmental testing. Soil can be moved by the contractor to an approved site on base or possibly could be spread out at site. Contact Billy Drandy @ 743-9985 ext 24 prior to final excavated soil disposition.

Excavator(s) must establish locations and depths of utilities in work area prior to digging, locations of utilities, as shown on drawing(s), are approximate and must be field verified by hand digging, cable/pipe locators or other approved methods.
